Processing Notes

1. The data are drawn from several publically-available datasets including the CIA World Factbook, the World Bank, the Association of Religion Data Archives, the United Nations Office on Drugs and Crime, the International Centre for Prison Studies, and the Stockholm International Peace Research Institute.

2. Due to the use of six different datasets and the number of variables and countries included, not all data reflects a particular year for a particular variable. Instead, data were compiled based on a) the most recent data available for each country; b) a vast majority of countries having data for a particular year (i.e., if one or two countries had data for 2010 and 2011 but the remaining countries only had data for 2010, the 2010 data would be used for those two countries for the sake of consistency); and c) data that was reflective of 2008 or later. Hence, the temporal range of the data is from 2008 to 2012.

3. The countries listed are intended to provide a representative sample of counties throughout the world.

4. Variables were selected in order to provide a comprehensive look at the economic, political, and social conditions of each country. Additionally, several variables were selected based on timely debates both on the national and international levels.

5. Missing data is represented with the value "-999."
